

ANÁLISIS DE DATOS

Universidad Metropolitana Castro Carazo

Facultad de Informática

Curso: Análisis de datos

Profesor: Ing. Josué Zuñiga Hernández

Semana: 01

Actividad: Mi entorno analítico

Nombre del Estudiante:

Yislein Madrigal Ramirez

URL del Repositorio Público:

<https://github.com/yislein27-cyber/2026C2-G03-PROGRAMACI-N>

Instrucciones:

1. Instalar **Anaconda** en tu equipo.
2. Explorar el entorno de **Jupyter Notebook**.
3. Un **Documento de evidencia de instalación y configuración** que debe publicarse en un nuevo repositorio personal de GitHub titulado obligatoriamente: "Mi entorno analítico".

El documento debe incluir:

- Capturas de pantalla que demuestren el proceso seguido y las configuraciones realizadas.
- Breves comentarios de análisis sobre lo aprendido durante la instalación.

ANÁLISIS DE DATOS

The screenshot displays the Anaconda website's installation page. At the top, the navigation bar includes the Anaconda logo, links for Products, Solutions, Resources, and Company, a Sign In button, and a green Get Demo button. The main content area is divided into two columns: 'Anaconda Distribution' and 'Miniconda'. Each column provides a brief description, a link to a 'GRAPHICAL INSTALLER' (64-Bit (Apple silicon) Graphical Installer), a link to 'Graphical install instructions', and a 'COMMAND LINE' section with a link to 'CLI install instructions'. Below these columns, a link suggests comparing the two installers. A 'BETA INSTALLERS' section with a warning message is also visible. A chatbot bubble asks 'Hi, how can I help?'. The bottom of the page shows a confirmation message: 'You're All Set—Let's Get Started', stating that Anaconda Distribution has started downloading. Below this, a section titled 'Launch Your First Environment' provides instructions on how to proceed. The browser's address bar shows the URL 'anaconda.com', and the taskbar at the bottom indicates the user is 'JOSUE ZUNIGA HERNANDEZ'.

Anaconda Distribution

Package and environment management with conda, Anaconda Navigator desktop app, and 600+ packages. Everything you need for data science.

GRAPHICAL INSTALLER

[64-Bit \(Apple silicon\) Graphical Installer](#)

Graphical install instructions

COMMAND LINE

CLI install instructions

Miniconda

Lightweight installer that only includes conda, Python, and their dependencies. Install only what you need.

GRAPHICAL INSTALLER

[64-Bit \(Apple silicon\) Graphical Installer](#)

Graphical install instructions

COMMAND LINE

CLI install instructions

Need help choosing an installer? [Compare Anaconda Distribution vs. Miniconda](#)

BETA INSTALLERS

Beta releases may be unstable. Not recommended for production use.

Hi, how can I help?

You're All Set—Let's Get Started

Anaconda Distribution has started downloading. Here's what to do next.

Didn't download? [Try again](#).

Launch Your First Environment

Install Anaconda Distribution, launch Anaconda Navigator, and start building immediately. Choose a ready-to-use environment or build your own.

ANALISIS DE DATOS

ANALISIS DE DATOS

ANALISIS DE DATOS

The image displays two screenshots of the Anaconda Navigator application interface, showing various data science and machine learning tools available within the environment.

Top Screenshot (base (root) environment):

- PyCharm:** The only Python IDE you need – built for data and AI/ML professionals. Supercharged with an AI-enhanced IDE experience. Free forever, plus one month of Pro included. (Install)
- Anaconda Cloud Notebooks:** Cloud-hosted notebook service from Anaconda. Launch a preconfigured environment with hundreds of packages and store project files with persistent cloud storage. (Launch)
- Jupyter Notebook:** Web-based, interactive computing notebook environment. Edit and run human-readable docs while describing the data analysis. (Launch)
- Qt Console:** PyQt GUI that supports inline figures, proper multiline editing with syntax highlighting, graphical calltips, and more. (Launch)
- Spyder:** Scientific Python Development Environment. Powerful Python IDE with advanced editing, interactive testing, debugging and introspection features. (Launch)
- EduBlocks:** Web-based coding platform from Anaconda designed for students. Learn Python coding through an interactive, block-based visual environment. (Launch)
- IBM watsonx:** IBM watsonx is an enterprise-ready AI platform including a data store, model builder, and AI model management and monitoring. (Launch)
- ORACLE Cloud Infrastructure:** OCI Data Science offers a machine learning platform to build, train, manage, and deploy your machine learning models on the cloud with your favorite open-source tools. (Launch)

Bottom Screenshot (Python311315 environment):

- PyCharm:** The only Python IDE you need – built for data and AI/ML professionals. Supercharged with an AI-enhanced IDE experience. Free forever, plus one month of Pro included. (Install)
- Anaconda Toolbox:** JupyterLab supercharged with a suite of Anaconda extensions, starting with the Anaconda Assistant AI chatbot. (Install)
- Anaconda Cloud Notebooks:** Cloud-hosted notebook service from Anaconda. Launch a preconfigured environment with hundreds of packages and store project files with persistent cloud storage. (Launch)
- VS Code:** Streamlined code editor with support for development operations like debugging, task running and version control. (Launch)
- EduBlocks:** Web-based coding platform from Anaconda designed for students. Learn Python coding through an interactive, block-based visual environment. (Launch)
- IBM watsonx:** IBM watsonx is an enterprise-ready AI platform including a data store, model builder, and AI model management and monitoring. (Launch)
- ORACLE Cloud Infrastructure:** OCI Data Science offers a machine learning platform to build, train, manage, and deploy your machine learning models on the cloud with your favorite open-source tools. (Launch)
- PyScript:** Code and share Python in the Browser. A vibrant community of makers, builders, and hackers building the next frontier of Python-powered web applications. (Launch)
- Pythonanywhere:** Host, run, and code Python in the cloud! Get started for free. (Launch)
- Glueviz:** Multidimensional data visualization across files. Explore relationships within and among related datasets. (Install)
- JupyterLab:** An extensible environment for interactive and reproducible computing, based on the Jupyter Notebook and Architecture. (Install)
- Jupyter Notebook:** Web-based, interactive computing notebook environment. Edit and run human-readable docs while describing the data analysis. (Install)
- Orange 3:** Component based data mining framework. Data visualization and data analysis for novice and expert. Interactive workflows with a large toolbox. (Install)
- Qt Console:** PyQt GUI that supports inline figures, proper multiline editing with syntax highlighting, graphical calltips, and more. (Install)
- Spyder:** Scientific Python Development Environment. Powerful Python IDE with advanced editing, interactive testing, debugging and introspection features. (Install)

The bottom screenshot also shows a sidebar on the right with a grid of user avatars, including JH, JM, JA, KV, MA, SB, KA, MM, KB, MD, YR, and others.

ANALISIS DE DATOS

The top screenshot displays the Anaconda Navigator interface. A 'Create new environment' dialog box is open, showing fields for 'Name' (set to 'New environment name'), 'Location', and 'Packages' (with checkboxes for Python and R). In the background, a list of installed packages is visible, including _anaconda_depends, aiohttp, altair, anaconda-anon-usage, anaconda-auth, anaconda-catalogs, anaconda-channel-guide, and anaconda-cli-base. A progress bar at the bottom indicates 'Verifying anaconda-toolbox on /opt/anaconda3'.

The bottom screenshot shows the main dashboard of Anaconda Navigator. It features a grid of application tiles, each with a logo, name, version, and a 'Launch' button. The tiles include PyCharm, Anaconda Toolbox, Anaconda Cloud Notebooks, VS Code, EduBlocks, IBM Watsonx, Oracle Data Science Service, PyScript, Pythonanywhere, Glueviz, JupyterLab, Jupyter Notebook, Orange3, Qt Console, and Spyder. The interface also includes a sidebar with navigation options like Home, Environments, Learning, and Community, and a top bar with system status and user information.

ANALISIS DE DATOS

The image displays two screenshots of data science software interfaces. The top screenshot shows the Anaconda Navigator application on a macOS desktop. The interface includes a sidebar with 'Home', 'Environments', 'Learning', and 'Community'. The main area shows a list of installed environments, with 'Python31315' selected. A table of installed packages is visible, including _anaconda_depends, aiobotocore, aiodns, aiohappyeyeballs, aiohttp, aiortools, aiosignal, alabaster, altair, anaconda-anon-usage, anaconda-auth, anaconda-catalogs, anaconda-channel-guide, and anaconda-cli-base. The bottom screenshot shows the JupyterLab interface, which is a web-based environment for data science. It features a file browser, a notebook editor, a console, and a terminal. The 'View' menu is open, showing options like 'Activate Command Palette', 'Appearance', 'File Browser', 'Property Inspector', 'Sessions and Tabs', 'Table of Contents', 'Debugger Panel', 'Extension Manager', 'Show Notifications', 'Show Log Console', 'Show Line Numbers', 'Match Brackets', 'Wrap Words', 'Collapse Selected Code', 'Collapse Selected Outputs', 'Collapse All Code', 'Collapse All Outputs', 'Code Folding', 'Expand Selected Code', 'Expand Selected Outputs', 'Expand All Code', 'Expand All Outputs', 'Render Side-by-Side', and 'Text Editor Syntax Highlighting'. The bottom status bar indicates the user is 'JOSUE ZUNIGA HERNANDEZ'.

Search Packages

Name	Description	Version
✓ _anaconda_depends	○ Simplifies package management and deployment of anaconda	2026.07
✓ aiobotocore	○ Async client for aws services using botocore and aiohttp	3.7.0
✓ aiodns	○ Simple dns resolver for asyncio	3.6.1
✓ aiohappyeyeballs	○ Happy eyeballs for asyncio	2.6.2
✓ aiohttp	○ Async http client/server framework (asyncio)	3.14.1
✓ aiortools	○ Asyncio version of the standard multiprocessing module	0.12.0
✓ aiosignal	○ Aiosignal: a list of registered asynchronous callbacks	1.4.0
✓ alabaster	○ Lightweight, configurable sphinx theme	1.0.0
✓ altair	○ A declarative statistical visualization library for python	6.0.0
✓ anaconda-anon-usage	○ Basic anonymous telemetry for conda clients	0.8.1
✓ anaconda-auth	○ A client auth library for anaconda apis	0.15.1
✓ anaconda-catalogs	○ Client library to interface with anaconda cloud catalogs service	0.2.0
✓ anaconda-channel-guide	○ Conda plugin that guides users to main-x channel packages	0.1.1
✓ anaconda-cli-base	○ A base cli endpoint supporting anaconda cli plugins	0.9.1

ANALISIS DE DATOS

ANÁLISIS DE DATOS

The screenshot displays a Zoom meeting interface. At the top, a row of participant avatars is visible, including JH (JOSUE ZUNIG), JM (JOSUE SEBAS), JA (Jose Pablo), KV (KATHERIN), MA (MORGAN), MD (Mauricio), MM (Mario), and YR. The main content area shows a presentation slide for Anaconda Navigator, which features a grid of application tiles such as PyCharm, Anaconda ToolBox, JupyterLab, VS Code, and others. Below the presentation, a JupyterLab interface is visible, showing a file explorer on the left with a list of folders and files, and a central area with a 'Launcher' tab containing icons for Notebook, Console, and Python 3 (ipykernel). The bottom of the screen shows a Windows taskbar with various application icons and a system clock.

El proceso consistió en:

- Descarga del instalador de Anaconda Distribution para macOS (versión Apple Silicon) desde la página oficial.
- Proceso de ejecución del instalador de Anaconda3 2026.07-1 en el sistema operativo, mostrando el progreso de los scripts y la pantalla de finalización exitosa.

ANÁLISIS DE DATOS

- Apertura del panel principal de **Anaconda Navigator**, mostrando las distintas herramientas de ciencia de datos disponibles.
- Creación y configuración de un nuevo entorno virtual específico (nombrado *Python31315*) desde la pestaña "Environments" para gestionar las dependencias del curso de forma aislada.
- Instalación y lanzamiento de **JupyterLab** y **Jupyter Notebook** dentro del entorno recién creado en Anaconda Navigator.
- Exploración de la interfaz de JupyterLab ejecutándose localmente en el navegador, mostrando la estructura de carpetas y el *Launcher* para crear nuevos *Notebooks*
- Es importante especificar que para el desarrollo de este curso ya contaba con GitHub instalado y configurado en mi equipo, ya que fue una herramienta que utilizamos de forma activa durante el curso pasado. Por esta razón, el repositorio se gestionó utilizando mi configuración previamente establecida.
- Asimismo, durante la instalación y configuración, aprendí la importancia de utilizar Anaconda para crear entornos virtuales aislados (como el entorno *Python31315* que configuré). Esto es fundamental para el análisis de datos, ya que permite manejar diferentes versiones de bibliotecas sin generar conflictos con otros proyectos.
